**For the Attention of Tom Gibbons**

**Re: M1400/0120/EG – Appreciation Letter**

Dear Mr Tom Gibbons,

I am just writing to express my appreciation for your efforts with regards to the Camden Town Hall Annex project, a highly technical and fascinating scheme which included your £2 million subcontract package as one of the essential elements of the project.

As one of the landmarks of the brutalist architecture in the UK, the fusion between original pre-cast concrete panels and new aluminium windows was key to maintain its original appearance whilst improving the performance and aesthetical aspects of the building.

Your inestimable support at design stage providing your expertise, attending design workshops and exploring all sorts of worldwide suppliers, translated into a successful bespoke element that suits the requirements of the client. It is also with satisfaction that I would like to highlight the professionalism of your workforce until the date, working always alongside McLaren site managers and overtaking any site difficulties that might have arisen from different constraints.

Now that we are weeks away from completion, I am happy to confirm that we are heading towards a successful completion of your package in both time and budget. As a result, I have personally recommended IWP to be incorporated within our “preferred sub-contractor” list.

Many thanks for your enthusiasm and professionalism.

Sincerely,

For and on behalf of McLaren Construction (London) Ltd

Emilio Garcia
